

## 1986 INDEX

### A

**Abdomen**  
mass in neuroblastoma, in children, Mar. 187  
wall  
    Fixation in rectal prolapse, June 417  
    reconstruction, flaps for, muscle and myocutaneous, May 366-367  
    reconstruction, flaps for, muscle and myocutaneous, results, May 381  
    reconstruction, flaps for, muscle and myocutaneous, use frequency, May 366  
    reconstruction, omental transposition in, Nov. 829-830  
    stomach separation from, after gastrectomy, Sept. 689  
Abscess of lung, Jan. 38-73  
    acute, Jan. 61  
    aerobic infection, Jan. 60-62  
    amebic, Jan. 76  
    anaerobic  
        pathogenesis, Jan. 42-49  
        pathology, Jan. 42-49  
    anaerobic infection in, Jan. 58-60  
in antibiotic era, Jan. 41  
aspiration  
    direct percutaneous needle, Jan. 65-67  
    from oropharynx, Jan. 41-42  
    tratracheal, Jan. 65-66  
carcinoma confused with, Jan. 59  
chronic, bronchography of, Jan. 48  
classification, Jan. 39  
clinical manifestations, Jan. 53-67  
CT in, Jan. 64  
definition, Jan. 39  
diagnosis, Jan. 53-73  
drainage, Jan. 70-73  
    contraindications, Jan. 72-73  
    external, Jan. 70-72  
    indications, Jan. 72-73  
    internal, Jan. 70  
dysphagia in (see *Dysphagia*)  
hemoptysis and toxicity in, Jan. 63  
historical background, Jan. 39-41  
*Klebsiella* causing, Jan. 52  
lung resection in, Jan. 72-73

management, Jan. 67-73  
    approach to, Jan. 68  
*Mycobacterium tuberculosis* in, Jan. 56  
pneumonia (see *Pneumonia, in lung abscess*)  
in preantibiotic era, Jan. 39-41  
secondary, Jan. 53  
specimen  
    handling of, Jan. 66-67  
    syringe method for, Jan. 66  
    transport media, Jan. 66-67  
sputum in, expectorated, Jan. 65  
*Staphylococcus aureus* in, Jan. 58  
Abscess: plantar, in diabetic, Oct. 745, 777-781  
Absorption: omentum, Nov. 807  
Adenocarcinoma  
    of cervix, clear cell, in children, Mar. 234  
    of rectum, Dec. 895  
    of vagina, clear cell, in children, Mar. 234  
Adenomatoid anomaly of lung, congenital cystic, Apr. 289-297  
classification, Apr. 293  
Adhesion: omentum, Nov. 805-807  
Aerobic infection: in lung abscess, Jan. 60-62  
Age  
    bronchiectasis surgery and, Feb. 133-134  
    at diagnosis in malignant teratoma, in children, Mar. 218  
    neuroblastoma and, in children, Mar. 196  
    pelvic exenteration and, Dec. 882-883  
Agenesis  
    lung, Apr. 274-277  
    unilateral, Apr. 276  
    pulmonary artery, Apr. 303  
    trachea, Apr. 256-257  
AIDS: isolators for, July 540  
Air  
    clean-air (see *Clean-air*)  
    ultraclean (see *Ultraclean air*)  
Airflow (see *Laminar airflow*)  
Alveolar elements: in embryology of lower respiratory tract, Apr. 252-255  
Ambulance: transport isolator for patients, July 513

## 1986 INDEX

### A

**Abdomen**  
mass in neuroblastoma, in children, Mar. 187  
wall  
    Fixation in rectal prolapse, June 417  
    reconstruction, flaps for, muscle and myocutaneous, May 366-367  
    reconstruction, flaps for, muscle and myocutaneous, results, May 381  
    reconstruction, flaps for, muscle and myocutaneous, use frequency, May 366  
    reconstruction, omental transposition in, Nov. 829-830  
    stomach separation from, after gastrectomy, Sept. 689  
Abscess of lung, Jan. 38-73  
    acute, Jan. 61  
    aerobic infection, Jan. 60-62  
    amebic, Jan. 76  
    anaerobic  
        pathogenesis, Jan. 42-49  
        pathology, Jan. 42-49  
    anaerobic infection in, Jan. 58-60  
in antibiotic era, Jan. 41  
aspiration  
    direct percutaneous needle, Jan. 65-67  
    from oropharynx, Jan. 41-42  
    tratracheal, Jan. 65-66  
carcinoma confused with, Jan. 59  
chronic, bronchography of, Jan. 48  
classification, Jan. 39  
clinical manifestations, Jan. 53-67  
CT in, Jan. 64  
definition, Jan. 39  
diagnosis, Jan. 53-73  
drainage, Jan. 70-73  
    contraindications, Jan. 72-73  
    external, Jan. 70-72  
    indications, Jan. 72-73  
    internal, Jan. 70  
dysphagia in (see *Dysphagia*)  
hemoptysis and toxicity in, Jan. 63  
historical background, Jan. 39-41  
*Klebsiella* causing, Jan. 52  
lung resection in, Jan. 72-73

management, Jan. 67-73  
    approach to, Jan. 68  
*Mycobacterium tuberculosis* in, Jan. 56  
pneumonia (see *Pneumonia, in lung abscess*)  
in preantibiotic era, Jan. 39-41  
secondary, Jan. 53  
specimen  
    handling of, Jan. 66-67  
    syringe method for, Jan. 66  
    transport media, Jan. 66-67  
sputum in, expectorated, Jan. 65  
*Staphylococcus aureus* in, Jan. 58  
Abscess: plantar, in diabetic, Oct. 745, 777-781  
Absorption: omentum, Nov. 807  
Adenocarcinoma  
    of cervix, clear cell, in children, Mar. 234  
    of rectum, Dec. 895  
    of vagina, clear cell, in children, Mar. 234  
Adenomatoid anomaly of lung, congenital cystic, Apr. 289-297  
classification, Apr. 293  
Adhesion: omentum, Nov. 805-807  
Aerobic infection: in lung abscess, Jan. 60-62  
Age  
    bronchiectasis surgery and, Feb. 133-134  
    at diagnosis in malignant teratoma, in children, Mar. 218  
    neuroblastoma and, in children, Mar. 196  
    pelvic exenteration and, Dec. 882-883  
Agenesis  
    lung, Apr. 274-277  
    unilateral, Apr. 276  
    pulmonary artery, Apr. 303  
    trachea, Apr. 256-257  
AIDS: isolators for, July 540  
Air  
    clean-air (see *Clean-air*)  
    ultraclean (see *Ultraclean air*)  
Airflow (see *Laminar airflow*)  
Alveolar elements: in embryology of lower respiratory tract, Apr. 252-255  
Ambulance: transport isolator for patients, July 513

Amebiasis: pleuropulmonary, Jan. 73-80

Amebic  
 empyema (see Empyema, amebic)  
 lung abscess, Jan. 76  
 pericarditis with amebic empyema, Jan. 79

Amputation in diabetic  
 above-knee, Oct. 773  
 ankle pressures and, Oct. 761-762  
 below-knee, Oct. 773  
 vascular laboratory criteria for primary healing of, Oct. 764

Chopart  
 healed, Oct. 771  
 prosthesis, Oct. 772

forefoot, Oct. 746

major, prediction of healing, Oct. 763-764

minor, prediction of healing, Oct. 761-765

prosthesis, in place, Oct. 773

Syme, Oct. 772

toe pressures and, Oct. 762-763

transmetatarsal  
 healed, Oct. 770  
 orthosis for, Oct. 770  
 prediction of healing, Oct. 761-765

Aerobic (see Abscess of lung, anaerobic)

Anal  
 orifice encirclement in rectal prolapse, June 432-434  
 postanal repair after rectal prolapse surgery, June 444-445  
 sphincters in rectal prolapse, June 405

Anastomosis  
 distal, to vessels in lower third of leg, in diabetic foot, Oct. 758  
 esophageal, omental transposition in, Nov. 848  
 gastrointestinal, omental transposition for, Nov. 831  
 ureteroileal open, Dec. 911

Anemia  
 aplastic, marrow transplant in, July 536-538  
 in neuroblastoma, in children, Mar. 187

Anesthesia: for open drainage of empyema, Jan. 22-23

Angiodilatation: in diabetic foot, Oct. 748-750

Angiogenesis: omentum, Nov. 805

Ankle  
 joint

Charcot, Oct. 731  
 in osteomyelitis, muscle flap closure, May 357

neuropathic, in diabetes, Oct. 732

pressures to predict healing in transmetatarsal and minor amputations in diabetic, Oct. 761-762

Anomalies  
 bronchial, Apr. 257-268  
 arising from foregut derivatives, Apr. 266-268

bronchopulmonary, congenital, Apr. 251-314

congenital, and Wilms tumor, Mar. 198-199

of lung, congenital cystic adenomatoid, Apr. 289-297  
 classification, Apr. 293

pulmonary arteriovenous, Apr. 301

pulmonary vascular, Apr. 298-303 in rhabdomyosarcoma, in children, Mar. 171

sequestration, unusual, Apr. 271

Aplasia: lung, Apr. 274-277

Arm  
 (See also Extremities, upper)  
 omental transposition to, Nov. 853

Arteries  
 celiac, Nov. 798  
 gastroepiploic (see Gastroepiploic artery)

iliac, stenosis, in diabetic, angiodilatation, Oct. 749

pedal, anatomy, Oct. 756

peroneal, in in situ bypass in diabetic foot, Oct. 757

pulmonary, agenesis, Apr. 303

reconstruction (see Foot, diabetic, arterial reconstruction in)  
 supply of omentum, Nov. 800

tibial, posterior, systolic pressure measurement in, Oct. 737

Arteriography: in diabetic foot, Oct. 747-748

Arteriovenous fistula: pulmonary, Apr. 299-301

Asphyxiating thoracic dystrophy, Apr. 282

Aspiration  
 in abscess of lung (see Abscess of lung, aspiration)  
 pneumonia (see Pneumonia, aspiration)

Asthma: and bronchiectasis, Feb. 149

Ataxia: cerebellar, in neuroblastoma, in children, Mar. 186

Atresia  
 bronchial, Apr. 259-261

Atresia (*cont.*)

- esophageal, gastrostomy in, Sept. 686-687
- tracheal, Apr. 256-257
- Attitude: and pelvic exenteration, Dec. 883
- Axilla: omental transposition to, Nov. 849-850

B

- Back reconstruction, muscle and myocutaneous flaps for, May 367
- results, May 381-382
- use frequency, May 367
- Bacteria
  - controlled nursing unit, July 519-521
  - gram-negative, in pneumonia, Jan. 51
- Barrier (*see Partial barrier*)
- BCNU, July 519-521
- Beck-Jianu gastrostomy, Sept. 675
- Biceps femoris myocutaneous flap, May 338
- Biopsy: in tongue cancer, Aug. 578-579
- Bladder: rhabdomyosarcoma, in children, Mar. 174-177
- Blood
  - flow detector, Doppler, Oct. 735
  - supply
    - to omentum, Nov. 798-800
    - to skin, and flaps, May 330
- "Blue toe syndrome," Oct. 751
- Bone
  - flaps that carry, May 351
  - marrow (*see Marrow*)
  - vascularized, compound
    - myocutaneous flap carrying, May 352
- Bowel, small
  - perforation, in gastrostomy, Sept. 704
  - prolapse, omental transposition in, Nov. 838
- Brachial plexopathy: radiation-induced, omental transposition in, Nov. 850-851
- Breast
  - cancer, recurrence, Nov. 819, 820
  - CT of, Nov. 821
  - after omental transposition, Nov. 856
  - metastases, dermal lymphatic, Nov. 825
  - reconstruction
    - 930

- flaps for, muscle and myocutaneous, May 365-366
- flaps for, muscle and myocutaneous, results, May 380-381
- flaps for, rectus abdominis, May 337
- flaps for, use frequency, May 365
- omental transposition in, Nov. 828-829

Bronchi

- aberrant, Apr. 259-260
- anatomy of, Feb. 104-111
- anomalies, Apr. 257-268
- anomalous, arising from foregut derivatives, Apr. 266-268
- apicoposterior bronchus, left, Feb. 110
- atresia, Apr. 259-261
- elements in lower respiratory tract embryology, Apr. 252-255
- esophagobronchial fistula, Feb. 144
- tracheal, Apr. 258-259
- Bronchiectasis, Feb. 97-159
- asthma and, Feb. 149
- bilateral, total, Feb. 122-123
- bronchitis and, Feb. 149
- complications, Feb. 145
- congenital, Apr. 261
- controversial areas concerning, Feb. 145-150
- distribution, Feb. 128-129, 135
- with empyema, Jan. 28
- extent shown bronchographically, Feb. 134-137
- fate of chronically shrunken, airless lobe, Feb. 149-150
- historical background, Feb. 98-104
- of left lung, congenital, Apr. 262
- lung resection, anatomical limits of, Feb. 131-133
- of middle lobe, Feb. 136-137, 138
- natural history, Feb. 129-131
- pathology, Feb. 117-129
- preservation of apical segment of lower lobe in, Feb. 147-148
- resections in, Feb. 139
- bilateral, Feb. 140
- bilateral, controversy concerning, Feb. 145-146
- with cardiovascular surgery, Feb. 141
- cause of bronchiectasis, established, Feb. 143-144
- complications, Feb. 144-145
- "sump," Feb. 146-147
- right, total, Feb. 124
- surgery

age and, Feb. 133-134  
 incidence, Feb. 103  
 mortality in, Feb. 141  
 patient selection, Feb. 133-137  
 planning, value of bronchography  
     in, Feb. 118  
 pulmonary vascular bed state  
     and, Feb. 137  
 results, Feb. 138-145  
 symptomless, as complication, Feb.  
     148-149  
 symptoms, Feb. 134  
 Bronchitis: and bronchiectasis, Feb.  
     149  
 Bronchobiliary fistula, Apr. 268  
 Bronchoesophageal fistula, Jan. 55,  
     Feb. 144  
 Bronchogenic cyst, Apr. 287-289,  
     290-291  
     histologic appearance, Apr. 287  
     mediastinal, Apr. 266  
 Bronchography, Feb. 111-117  
     contrast media for, Feb. 111-113  
     of empyema, Jan. 29  
     extent of bronchiectasis shown by,  
         Feb. 134-137  
     of left upper bronchus, Feb. 108,  
         109  
     of lung abscess, chronic, Jan. 48  
     normal, Feb. 105  
     in pneumonia  
         aspiration, Jan. 40  
         chronic destructive, Jan. 47  
     repeated over 5 year period, Feb.  
         119  
     technique, Feb. 113-117  
     value in planning surgery, Feb. 118  
 Broncholith: with bronchiectasis, Feb.  
     144  
 Bronchopleural fistula, Jan. 36-38  
     closure of fistula, Jan. 36-38  
         direct, Jan. 36  
     after lung resection, Jan. 36-38  
     muscle flap in, Jan. 36-38  
     obliteration of space, Jan. 36-38  
     omentum transposition in, Nov. 849  
     thoracoplasty in, Jan. 38  
 Bronchopulmonary anomalies:  
     congenital, Apr. 251-314  
 Bronchus (*see Bronchi*)  
 Burn patients  
     attempts to reduce endogenous  
         microflora of, July 526-527  
     isolators for, July 521-526  
 Button: gastrostomy, Sept. 696, 697  
 Bypass, *in situ* vein, in diabetic foot,  
     Oct. 753-754  
     new horizons, Oct. 754

Cancer  
     breast (*see Breast, cancer*)  
     in children (*see Children, cancer*)  
     colorectal, morbidity and survival  
         after pelvic exenteration, Dec.  
             899  
     gastric, omentectomy in, Nov. 812  
     liver (*see Liver cancer*)  
     oral (*see Oral, cancer*)  
     oropharyngeal, smoking and, Aug.  
         569  
     ovaries (*see Ovaries, cancer*)  
     pelvis (*see Pelvis, cancer*)  
     tongue (*see Tongue cancer*)  
 Capillaries: in greater omentum (in  
     rabbit), Nov. 796  
 Carcinoma  
     cervix (*see Cervix, carcinoma*)  
     confused with lung abscess, Jan. 59  
     rectum (*see Rectum, carcinoma*)  
     tongue, verrucous, Aug. 638-639  
 Cardiovascular surgery: with  
     pulmonary resection, Feb. 141  
 Carotid covey: omental transposition  
     for, Nov. 843-844  
 Catheter (*see Gastrostomy, catheter*)  
 Celiac artery, Nov. 798  
 Cells  
     germ cell tumors, in children, Mar.  
         220-221  
     extragonadal, Mar. 233  
     granular cell myoblastoma of  
         tongue, Aug. 639  
     mast, of omentum, Nov. 804-805  
 Cerebellar ataxia: in neuroblastoma,  
     in children, Mar. 186  
 Cervical  
     flaps for oral reconstruction, Aug.  
         617  
     nodes, metastases in, palpation  
         examination for, Aug. 582  
 Cervix  
     adenocarcinoma, clear cell, in  
         children, Mar. 234  
     carcinoma  
         pelvic exenteration in (*see Pelvis*  
             exenteration, in cervix  
             carcinoma)  
         postirradiation, gross specimen,  
             Dec. 886  
 Charcot joint, Oct. 730  
     ankle, Oct. 731  
     treatment, Oct. 766-767  
 Charnley-Howorth system, July 469  
 Charnley "sterile" enclosure: original,  
     July 471

Chemotherapy  
 in tongue cancer, Aug. 634-637  
 in Wilms' tumor, Mar. 203-204

Chest wall  
 (*See also Thoracic*)  
 defect, Marlex mesh in, Nov. 823  
 reconstruction  
 flaps for, latissimus dorsi  
 myocutaneous, May 335  
 flaps for, muscle and  
 myocutaneous, May 363-364  
 flaps for, results, May 379-380  
 omentum in (*see Omentum*,  
 greater, transposition, in chest  
 wall reconstruction)

Children  
 adenocarcinoma of vagina-cervix,  
 clear cell, Mar. 234  
 cancer, Mar. 167-242  
 liver (*see Liver cancer, in  
 children*)  
 ovarian (*see Ovarian cancer, in  
 children*)  
 survival, improving, Mar. 169  
 therapy, long-range effects, Mar.  
 234-235

Ewing's sarcoma, extraosseous,  
 Mar. 231

Fibrosarcoma, Mar. 230-231  
 gastrostomy in, percutaneous  
 endoscopic, Sept. 678-680  
 germ cell tumors, Mar. 220-221  
 extragonadal, Mar. 233  
 gonadoblastoma, Mar. 221  
 hemangiopericytoma, Mar. 234  
 hematoblastoma, in boy, Mar. 213  
 isolation systems for, July 501-502  
 kidney tumors, Mar. 198-211  
 leiomyosarcoma, Mar. 233  
 liposarcoma, Mar. 233  
 lung cysts, congenital, with tumors,  
 Apr. 286  
 lymphoma, surgery of, Mar.  
 227-230  
 neuroblastoma (*see Neuroblastoma,  
 in children*)  
 neurofibrosarcoma, Mar. 232-233  
 rectal prolapse, June 413  
 rhabdomyosarcoma (*see  
 Rhabdomyosarcoma, in  
 children*)  
 soft tissue sarcoma, small-cell, Mar.  
 232  
 solid tumors, malignant, Mar.  
 167-242  
 (*See also Children, cancer*)  
 stromal tumors, Mar. 221-222  
 synovial sarcoma, Mar. 231-232

teratoma (*see Teratoma, malignant,  
 in children*)  
 testicular tumors (*see Testes,  
 tumors, in children*)  
 Wilms tumor (*see Wilms tumor, in  
 children*)  
 Chopart amputation (*see Amputation  
 in diabetic, Chopart*)  
 Cigarette smoking: and  
 oropharyngeal cancer, Aug. 569  
 Circlo-matic beds: for isolators, July  
 507

Circulation  
 impairments in diabetic foot, Oct.  
 730-731  
 microcirculation for flaps, May 330  
 Claudication: in diabetic foot, Oct.  
 744  
 Clavicle: radiation osteonecrosis,  
 omental transposition in, Nov.  
 845

Clean-air, 462-473  
 Charnley-Howorth system, July 469  
 surgical microbiologic, July  
 462-463

"Clean wall unit," July 515

Colon  
 cancer, pelvic exenteration in,  
 morbidity and survival after,  
 Dec. 899  
 ischemia after omental  
 transposition, Nov. 855  
 plication with presacral rectopexy,  
 June 423  
 transverse, omentum detached  
 from, Nov. 814

Colopexy: in rectal prolapse, June  
 417-418

Colorectal cancer: pelvic exenteration  
 in, morbidity and survival  
 after, Dec. 899

Computed (*see Tomography,  
 computed*)

Contamination  
 microbial, control in operating  
 room, July 458-499  
 microbial cross-contamination on  
 wards, control of, July 500-544  
 operative wound classification and,  
 July 459

Contrast media: for bronchography,  
 Feb. 111-113

CT (*see Tomography, computed*)

Cyst  
 bronchogenic (*see Bronchogenic  
 cyst*)  
 lung, congenital, with tumors, in  
 children, Apr. 286

Cystectomy: post-cystectomy sinus, omental transposition in, Nov. 842  
Cystic adenomatoid anomaly of lung, congenital, Apr. 289-297  
classification, Apr. 293  
lung lobe, left upper, Apr. 266

**D**

"Dancing eyes:" in neuroblastoma, in children, Mar. 186  
Death (see mortality)  
Decompression gastrostomy, Sept. 678  
Decortication (see Empyema, decortication in)  
Dehiscence: after gastrostomy, Sept. 689-691  
Dépâge gastrostomy, Sept. 675  
de Pezzer gastrostomy catheter, Sept. 698  
Depressor anguli oris myocutaneous flap, May 333  
Dermal lymphatic metastases: breast, Nov. 825  
Descending perineum syndrome, June 407, 408  
Devadhar operation: in rectal prolapse, June 430-431  
Devascularization: gastric, after omental transposition, Nov. 856  
Diabetic amputation (see Amputation)  
foot (see Foot, diabetic)  
gangrene in (see Gangrene)  
heel ulcer in, Oct. 773-776  
leg, ischemia in, assessment, Oct. 734  
neuropathy (see Neuropathy, diabetic)  
plantar abscess in, Oct. 745, 777-781  
Diaphragmatic hernia: congenital, Apr. 284  
Diarrhea: in neuroblastoma, in children, Mar. 187  
Diet: gastrostomy, Sept. 708  
Digital systolic pressure, Oct. 739  
Diverticulum esophageal, and bronchiectasis, Feb. 144  
tracheal, Apr. 258-259  
Doppler blood flow detector, Oct. 735  
Dragstedt gastrostomy, Sept. 671-672  
Drainage in abscess of lung (see Abscess of lung, drainage)

of empyema (see Empyema, drainage)  
Drug-induced leukopenia: marrow transplant in, July 536-538  
Dunphy operation: in rectal prolapse, June 416-417  
Duodenal perforation: omental transposition in, Nov. 830-831  
Dwarf: thanatophoric, Apr. 281  
Dysphagia in lung abscess, Jan. 62-65  
diagnosis, differential, Jan. 65  
pus examination in, Jan. 65  
radiography of, Jan. 62-65  
Dysplasia: pulmonary, pneumonectomy in, Apr. 251  
Dystrophy: asphyxiating thoracic, Apr. 282

 gastrophrenic, Nov. 796  
 lienorenal, Nov. 797

**Light:** ultraviolet, in prevention of nosocomial infection, July 474-479

**Limb**  
*(See also Extremities)*  
 pressures, segmental, in diabetic foot, Oct. 735-738  
 salvage in diabetic foot, Oct. 744-747

**Lip** reconstruction, flaps for lower lip, May 362  
 muscle and myocutaneous, May 363

**Liposarcoma:** in children, Mar. 233

**Liver** cancer, in children, Mar. 211-216  
 diagnosis, Mar. 211-212  
 therapy, Mar. 212-214  
 results, Mar. 215-216

**Loque procedure**, June 420

**Lung**  
*(See also Pulmonary)*  
 abscess (see Abscess of lung)  
 absent, Apr. 274-277  
 agenesis, Apr. 274-277  
 unilateral, Apr. 276  
 amebiasis, Jan. 73-80  
 anomalies, congenital, Apr. 251-314  
 aplasia, Apr. 274-277  
 cyst, congenital, with tumors, in children, Apr. 286  
 cystic adenomatoid anomaly, congenital, Apr. 289-297  
 classification, Apr. 293  
 cystic, upper lobe, Apr. 266  
 disease

parenchymal, Apr. 285-298  
 suppurative, Jan. 5-89

**Emphysema** (see Emphysema)

**hamartoma**, Apr. 297-298

**herniation, CT of**, Apr. 251  
 left, congenital bronchiectasis of, Apr. 262

**lobar buds**, Apr. 254

**resection**  
 anatomical limits of, Feb. 131-133  
 for bronchiectasis (see Bronchiectasis, resection)  
 bronchopleural fistula after, Jan. 36-38  
 empyema after (see Empyema, after lung resection)  
 in lung abscess, Jan. 72-73  
 sequestration (see Sequestration)  
 small, Apr. 274-277  
 tumors, Apr. 297-298

**Lymph nodes**  
 cervical, metastases in, palpation examination for, Aug. 582  
 contralateral, treatment for massive tongue cancer, Aug. 615-616

**Lymphangiectasia**, Apr. 301-302

**Lymphatics:** of omentum, Nov. 800-801

**Lymphedema:** omental transposition in, Nov. 852-853

**Lymphocytes:** of omentum, Nov. 804

**Lymphoma**  
 Hodgkin's, surgery of, in children, Mar. 227-230  
 malignant, isolators for patients with, July 531  
 non-Hodgkin's, surgery of, in children, Mar. 227-230

**M**

**Macrophages:** omentum, Nov. 803-804

**Mal perforans**, diabetic, Oct. 731-732  
 treatment, Oct. 767-768

**Malformations** (see Anomalies)

**Malignancy** (see Cancer)

**Mandible**  
 forces exerted by temporalis, masseter, and pterygoid muscles on, Aug. 630  
 reconstruction, flaps for, May 361  
 resection in tongue cancer, Aug. 613-615  
 tongue base, Aug. 631  
 with tongue resection, Aug. 612-613

**Marlex mesh**  
 in chest wall defect, Nov. 823  
 rectopexy, June 420

**Marrow**  
 cells cultured from, in  
 neuroblastoma, labeling index  
 of, in children, Mar. 197

**transplantation**  
 isolators for patients after, July  
 536-538  
 in neuroblastoma, in children,  
 Mar. 195-196

**Masseter muscle**: forces exerted on  
 mandible by, Aug. 630

**Mast cells**: omentum, Nov. 804-805

**Mediastinum**  
 anterior, muscle and myocutaneous  
 flaps for, May 365  
 reconstruction, results with flaps,  
 May 379-380  
 tumors in neuroblastoma, in  
 children, Mar. 187

**Mental status**: and pelvic  
 exenteration, Dec. 883

**Metastases**  
 in cervical nodes, palpation  
 examination for, Aug. 582  
 dermal lymphatic, breast, Nov. 825  
 in neuroblastoma, in children, Mar.  
 187  
 omental, Nov. 808-810  
 in Wilms tumor, in children, Mar.  
 208

**Metronidazole**, Jan. 79  
 in amebic empyema, Jan. 75

**Microbial**  
 contamination, control in operating  
 room, July 458-499  
 cross-contamination, control on  
 wards, July 500-544

**Microcirculation**: for flaps, May 330

**Mill's valvulotome**, Oct. 755

**Moniliasis**: after gastrostomy, Sept.  
 694-695

**McTally**  
 in bronchiectasis surgery, Feb. 141  
 of omental transposition, Nov. 857  
 in oropharyngeal cancer, and  
 smoking, Aug. 569  
 in rhabdomyosarcoma, in children,  
 influence of site, Mar. 176

**Moschowitz operation**: in rectal  
 prolapse, June 414-415

**Motor innervated flap**, May 354,  
 355

**Mouth (see Oral)**

**Muscle**  
 flap (see below)

**masseter**, forces exerted on  
 mandible by, Aug. 630

**pterygoid**, forces exerted on  
 mandible by, Aug. 630

**temporalis**, forces exerted on  
 mandible by, Aug. 630

**Muscle flap**, May 321-393  
 anatomy, May 324-330  
 applications, regional, May 358-373  
 for bronchopleural fistula, Jan.  
 36-38  
 complications, May 376-385  
 rate, May 378-379  
 compound flaps, May 351-352  
 for contaminated wounds, May 356  
 design, May 374  
 refinements, May 343-355  
 donor defect, May 374  
 example, May 322  
 flap size augmentation, surgical and  
 pharmacologic, May 331

**foot**  
 intrinsic, May 343  
 results, May 385  
 functional flaps, May 353-355  
 hemisoleus, May 343  
 history, May 323-324  
 inset of, May 375  
 intramuscular vascular territories,  
 May 325  
 for ischemic wounds, May 358  
 island pedicle transfer, May 349

**leg**  
 distal, May 343  
 results with, May 385  
 levator scapulae, May 342  
 for massive defects, May 358  
 microcirculatory physiology, May  
 330  
 microvascular transfer, May  
 349-351  
 motor innervated, May 354, 355  
 muscle kinesiology, May 331  
 physiology, May 330-331  
 postoperative care, May 376  
 preservation of donor motor  
 function, May 355  
 principal, May 341-343  
 for problem wounds, May 356-358  
 reversed, May 347, 348  
 rhomboideus major, May 342  
 sartorius, May 342  
 sensory innervated, May 354-355  
 serratus anterior, May 342  
 soleus, May 343  
 for tibia, May 344  
 split flaps, segmentally, May  
 345-347

Muscle flap (*cont.*)  
 success rate, May 376-385  
 temporalis, May 341  
 for tibia and ankle in osteomyelitis,  
 May 357  
 transfer, May 375  
 vascular supply, May 324-325, 326  
 vastus lateralis, May 342  
 wound preparation for, May  
 373-374  
 for wounds with dead space that  
 cannot be collapsed, May  
 357-358

*Mycobacterium tuberculosis*: in lung  
 abscess, Jan. 56

Myoblastoma: granular cell, tongue,  
 Aug. 639

Myocutaneous flap, May 321-393  
 anatomy, May 324-330  
 applications, regional, May  
 358-373  
 biceps femoris, May 338  
 complications, May 376-385  
 rate, May 378-379  
 compound flaps, May 351-352  
 carrying vascularized bone, May  
 352  
 carrying vascularized tendon,  
 May 353  
 for contaminated wounds, May 356  
 depressor anguli oris, May 333  
 design, May 374  
 refinements, May 343-355  
 donor defect, May 374  
 example, May 322  
 external oblique, May 336-337  
 fasciocutaneous extended, May  
 347-349  
 flap size augmentation, surgical and  
 pharmacologic, May 331  
 of foot, May 340-341  
 functional flaps, May 353-355  
 gastrocnemius, May 340  
 gluteus maximus, May 337  
 gracilis, May 338  
 hemisoleus, fasciocutaneous  
 extension, May, 350  
 history, May 323-324  
 inset of, May 375  
 for ischemic wounds, May 358  
 island pedicle transfer, May 349  
 latissimus dorsi, May 334-336  
 major flaps, May 328-329  
 for massive defects, May 358  
 microcirculatory physiology, May  
 330  
 microvascular transfer, May  
 349-351

motor innervated, May 354, 355  
 myocutaneous perforators, May  
 325-326, 327  
 myocutaneous territories, May  
 326-330  
 orbicularis oris, May 333  
 pectoralis  
 major, May 334  
 major, segmentally split, May 346  
 in tongue base cancer, Aug. 632  
 physiology, May 330-331  
 platysma, May 333-334  
 postoperative care, May 376  
 preservation of donor motor  
 function, May 355  
 principal, May 332-341  
 for problem wounds, May 356-358  
 for radiation wound closure,  
 ischemic, May 359  
 rectus abdominis, May 336  
 rectus femoris, May 338  
 reversed, May 347  
 sensory innervated, May 354-355  
 soleus, May 340  
 split flaps, segmentally, May  
 345-347  
 sternomastoid, May 334  
 success rate, May 376-385  
 ten most frequently used flaps, May  
 332  
 tensor fascia lata, May 337-338  
 from thigh, May 340  
 transfer, May 375  
 trapezius, May 334  
 upper-extremity, May 336  
 vastus medialis, May 338-339  
 wound preparation for, May  
 373-374

for wounds with dead space that  
 cannot be collapsed, May  
 357-358

N

Nasogastric tube: vs. gastrostomy,  
 Sept. 683-685

Neck  
 dissection for tongue cancer, Aug.  
 607-610  
 reconstruction  
 flaps for, muscle and  
 myocutaneous, May 358-363  
 flaps for, muscle and  
 myocutaneous, results, May  
 377-379  
 flaps for, muscle and  
 myocutaneous, use frequency,  
 May 360

omentum transposition in, Nov. 843-847  
omentum transposition in, free vascularized omental grafts, Nov. 845-847  
rhabdomyosarcoma, in children, Mar. 181-182  
Necrosis: omental, after transposition, Nov. 854  
Neoplasia (see Tumors)  
Nephrectomy: partial, omental transposition in, Nov. 843  
Nephroblastoma (see Wilms tumor)  
Nerves: of omentum, Nov. 801  
Netherlands system, July 517-519  
Neural pathways: of oral lesion referring pain to ear, Aug. 577  
Neuroblastoma, in children, Mar. 184-198  
age and, Mar. 196  
clinical aspects, general, Mar. 188-189  
clinical syndromes observed in, Mar. 186-187  
CT in, Mar. 192  
diagnosis, Mar. 185  
enolase in, neuron specific, Mar. 197-198  
ferritin and, serum, Mar. 197-198  
labeling index of cell cultures from marrow, Mar. 197  
nutrition in, state of, Mar. 197  
pathology, Mar. 184-185  
radiotherapy of, total body, Mar. 195-196  
stage I, Mar. 189-190  
stage II, Mar. 189-190  
stage III, Mar. 190-191  
stage IV, Mar. 194-195  
prognostic factors in, Mar. 196-198  
stage IV<sub>a</sub>, Mar. 192-194  
staging of, Mar. 185-188  
surgery of, Mar. 195-196  
surgical variables in, Mar. 196  
VMA/HVA ratio in, Mar. 197  
Neurofibrosarcoma: in children, Mar. 232-233  
Neuropathic ulcerations of foot, Oct. 731-732  
treatment, Oct. 767-768  
Neuropathy, diabetic, of foot, Oct. 730-731  
clinical decision-making, Oct. 741-742  
criteria for, Oct. 742

Neurosurgical procedures: gauntlet surgical isolator systems for, July 498  
Newborn  
emphysema of, lobar, Apr. 264  
gastrostomy and jejunostomy in, Sept. 686  
tracheal atresia, Apr. 257  
Nosocomial infection, July 458-558  
isolators in (see Isolators)  
operative wound classification by increasing risk, July 459  
prevention, July 458-558  
Notaras variation: of Thiersch procedure, June 434  
Nutritional state: and neuroblastoma, in children, Mar. 197

## O

Omentectomy, Nov. 808-812  
in gastric cancer, Nov. 812  
in ovarian cancer, Nov. 810-812  
Omentocystoplasty, Nov. 842  
Omentoureterostomy: cutaneous, Nov. 843  
Omentum  
gastrocolic, Nov. 796  
gastroplenic, Nov. 797  
Omentum, greater, Nov. 795-865  
absorption, Nov. 807  
adhesion, Nov. 805-807  
anatomy, Nov. 796-797  
angiogenesis, Nov. 805  
apron, Nov. 814  
division of, Nov. 815-818  
arterial supply, Nov. 800  
blood supply to, Nov. 798-800  
capillaries in (in rabbit), Nov. 796  
detachment from stomach, Nov. 814-815  
detachment from transverse colon, Nov. 814  
elongation, Nov. 816  
embryology, Nov. 801-803  
function, Nov. 803-807  
histology, Nov. 797-798  
immunology, Nov. 803-805  
lymphatics, Nov. 800-801  
lymphocytes, Nov. 804  
macrophages, Nov. 803-804  
mast cells, Nov. 804-805  
metastases, Nov. 808-810  
nerves, Nov. 801  
in oncology, Nov. 808-812  
pedicle, Nov. 817  
in surgery, Nov. 808-812  
transposition, Nov. 813-818

Omentum, greater (*cont.*)

- in abdominal wall reconstruction, Nov. 829-830
- to arm, Nov. 853
- to axilla, Nov. 849-850
- in bowel prolapse, small, Nov. 838
- in brachial plexopathy, radiation-induced, Nov. 850-851
- breast cancer recurrence after, Nov. 856
- in breast reconstruction, Nov. 828-829
- in bronchopleural fistula, Nov. 849
- as carotid cover, Nov. 843-844
- in chest wall reconstruction, Nov. 818-829
- in chest wall reconstruction, assessment, Nov. 821
- in chest wall reconstruction, end result, Nov. 828
- in chest wall reconstruction, preparation, Nov. 821
- in chest wall reconstruction, technique, Nov. 822-828
- colonic ischemia after, Nov. 855
- complications, Nov. 853-856
- in duodenal perforation, Nov. 830-831
- in esophageal anastomosis, Nov. 848
- in esophageal perforation, Nov. 849
- in esophagoplasty, Nov. 848
- future applications, Nov. 853
- gastric devascularization after, Nov. 856
- in gastric perforation, Nov. 830-831
- gastric stasis after, Nov. 855
- in gastrointestinal anastomoses, Nov. 831
- in gastrointestinal irradiation injury, Nov. 833
- for gastrointestinal reinforcement, Nov. 831
- for gastrointestinal reinforcement, free graft reinforcement, Nov. 831-832
- for gastrointestinal reinforcement, pedicled omental, Nov. 832
- in gastrointestinal surgery, Nov. 830-833
- to groin, Nov. 851-852
- to hand, Nov. 853
- in head reconstruction, Nov. 843-847
- in head reconstruction, free vascularized omental grafts, Nov. 845-847
- hematoma after, Nov. 855
- hemorrhage after, Nov. 855
- hernia after, incisional, Nov. 855
- intestinal obstruction after, Nov. 855
- intra-abdominal applications, Nov. 830, 833-838
- in lymphedema, Nov. 852-853
- mortality of, Nov. 857
- in neck reconstruction, Nov. 843-847
- in neck reconstruction, free vascularized omental grafts, Nov. 845-847
- necrosis after, Nov. 854
- in nephrectomy, partial, Nov. 843
- in pelvis exenteration, Nov. 837-838
- in pelvis fistula, Nov. 839-843
- in pelvis fistula prevention, Nov. 841
- in pelvis reconstruction, Nov. 834, 835, 836
- in pharyngostomy, Nov. 844-845
- in post-cystectomy sinus, Nov. 842
- in prostatorectal fistula, Nov. 841-842
- in reconstructive surgery, Nov. 812-813
- in reconstructive surgery, applications of, Nov. 818
- in rectal carcinoma, locally advanced, Nov. 836-837
- in rectal surgery, Nov. 834-836
- in thoracic surgery, Nov. 847-849
- tumor recurrence after, Nov. 856
- in ureterolysis, Nov. 842
- in urology, Nov. 839-843
- venous thrombosis after, Nov. 854
- in vesicovaginal fistula, Nov. 839-840
- in vesicovaginal fistula, assessment, Nov. 839
- in vesicovaginal fistula, preparation, Nov. 839
- in vesicovaginal fistula, technique, Nov. 839-840
- in vesicovaginorectal fistula, Nov. 840-841

Oncology: greater omentum in, Nov. 808-812

Operating room: microbial contamination control in, July 458-499  
Operating unit: germfree animal, July 481  
Operative wounds: classification of, July 459  
Opso-myoclonus: in neuroblastoma, in children, Mar. 186  
Oral cancer  
    radiotherapy, complication rate, Aug. 598  
    sites of, Aug. 573  
reconstruction, cervical and pectoral flaps for, Aug. 617  
sphincter, muscle and myocutaneous flaps for, May 363  
Orbicularis oris myocutaneous flap, May 333  
Orbit: rhabdomyosarcoma, Mar. 182  
Orofacial-mandibular reconstruction: flaps for, May 361  
Oropharynx  
    aspiration from, in lung abscess, Jan. 41-42  
    cancer, and smoking, Aug. 569  
Orthopedic procedures  
    gauntlet isolators for, July 494-498  
    major, ultraviolet light for  
        operating room, July 477  
Orthosis: for transmetatarsal amputation, Oct. 770  
Osteomyelitis: tibia and ankle in, muscle flap closure, May 357  
Osteonecrosis: of clavicle, radiation, omental transposition in, Nov. 845  
Ovarian cancer  
    in children, Mar. 220-223  
        adjunctive therapy, Mar. 223  
        surgery of, Mar. 222-223  
    omentectomy in, Nov. 810-812

## P

Pain  
    referred, to ear, from oral lesion, neural pathways for, Aug. 577  
rest, in diabetic foot, Oct. 741-742  
    criteria for, Oct. 741-742  
Paraplegia: in neuroblastoma, in children, Mar. 186  
Paratesticular site: of rhabdomyosarcoma, in children, Mar. 180-181

Partial barrier systems  
    Charnley-Howorth, July 469  
    in nosocomial infection prevention, July 462-473  
Patella: flaps for, muscle and myocutaneous, May 370  
Patellar tendon defects: flap in reconstruction, May 371  
Pectoral flap: for oral reconstruction, Aug. 617  
Pectoralis  
    major myocutaneous flap, May 334  
        segmentally split, May 346  
    myocutaneous flap for tongue base cancer, Aug. 632  
Pedal artery: anatomy, Oct. 756  
PEG (see Gastrostomy, percutaneous endoscopic)  
Pelite: lining molded polypropylene prosthesis, Oct. 771  
Pelvis  
    bony, resection, Dec. 916-917  
    cancer  
        gastrostomy in, Dec. 918  
        operations aimed at empty pelvis, Dec. 915-916  
        pathology, Dec. 877-878  
        pelvis extenteration in (see Pelvis extenteration, in pelvic cancer)  
        pelvis resection in, bony, Dec. 916-917  
        rectal reconstruction in, Dec. 912-913  
        surgery in, ultraradical, Dec. 875-927  
        surgery in, ultraradical (See also Pelvis extenteration, in pelvic cancer)  
        urinary diversion in, Dec. 908-912  
        vagina reconstruction in, Dec. 914-915  
    defects, obliteration of, Dec. 917-918  
    empty, operations aimed at, Dec. 915-916  
    extenteration (see below)  
    fistula  
        omentum transposition in, Nov. 839-843  
        prevention using omental transposition, Nov. 841  
    mass in neuroblastoma, in children, Mar. 186  
    reconstruction, omental transposition in, Nov. 834, 835, 836

Pelvis exenteration  
anterior, Dec. 879, 881  
in cervix carcinoma, Dec. 885-894  
complications, Dec. 905  
complications, postoperative, Dec. 903  
determination of operability at exploration, Dec. 888-890  
palliative, Dec. 893-894  
preoperative assessment of lesion, Dec. 885-888  
results, Dec. 890-893  
in colorectal cancer, morbidity and survival after, Dec. 899  
indications, Dec. 884-885  
lesions treated by, Dec. 879  
omental transposition in, Nov. 837-838  
in pelvic cancer  
age and, Dec. 882-883  
anterior, Dec. 908, 909  
assurance of localized disease, Dec. 883  
attitude and, Dec. 883  
complications, Dec. 902-907  
complications, early, Dec. 902-906  
complications, late, Dec. 906-907  
general medical assessment, Dec. 884  
intelligence and, Dec. 883  
mental status and, Dec. 883  
patient selection factors, Dec. 882-884  
perineal hernia, prevention and repair, Dec. 918  
posterior, Dec. 908  
quality of life after, Dec. 902

pelvis after, illus. ration, Dec. 880  
posterior, Dec. 879-880, 881  
in rectum carcinoma  
determination of operability at exploration, Dec. 897-899  
palliative, Dec. 901-902  
preoperative assessment of pelvic lesion, Dec. 894-897  
radiotherapy and, adjuvant, Dec. 918-921  
results, Dec. 899-901  
total, Dec. 879  
variations, Dec. 881  
Pericarditis: amebic, with amebic empyema, Jan. 79  
Perineum  
defects, obliteration of, Dec. 917-918

descending perineum syndrome, June 407, 408  
hernia, prevention and repair, Dec. 918  
reconstruction, flaps for results, May 382  
use frequency, May 370  
rectopexy in rectal prolapse, June 439-440  
rectosigmoidectomy in rectal prolapse, June 434-437  
Peroneal artery: in *in situ* bypass in diabetic foot, Oct. 757  
Pharyngeal groove, Apr. 254  
Pharyngolaryngoesophagectomy: omental transposition after, Nov. 844  
Pharyngostomy: omental transposition in, Nov. 844-845  
Photoplethysmograph: for digital systolic pressure, Oct. 739  
Physical barrier isolators, July 479-499  
on wards, July 500-512  
Plantar abscess: in diabetic, Oct. 745, 777-781  
Platysma myocutaneous flap, May 333-334  
Pleural space: suppurative diseases of, Jan. 5-89  
Pleuropulmonary amebiasis, Jan. 73-80  
Plexopathy: radiation-induced brachial, omental transposition in, Nov. 850-851  
Pneumatocele: staphylococcal, Jan. 54  
Pneumonectomy: in pulmonary dysplasia, Apr. 251  
Pneumonia  
aspiration  
anaerobic, sequelae, Jan. 42  
bronchography in, Jan. 40  
bacteria in, gram-negative, Jan. 51  
destructive  
bronchiectasis and, Feb. 144  
chronic, Jan. 46-47  
gram-positive, Jan. 51-53  
*Hemophilus influenzae* in, Jan. 53  
in lung abscess, Jan. 49-53  
etiology, Jan. 49-50  
pathogenesis, Jan. 50-51  
pathology, Jan. 51-53  
suppurative, radiography of, Jan. 45  
Pneumonitis, Jan. 43  
Pneumonostomy: closed-tube, failure of, Jan. 57

Polypropylene prosthesis: molded, lined with Pelite, Oct. 771  
Polyvinyl alcohol sponge repair: of rectal prolapse, June 427-429  
Portal venous system, Nov. 799  
Post-cystectomy sinus: omental transposition in, Nov. 842  
Postoperative wound infection, July 458-499  
Duke Medical Center Study, July 476  
after femoral neck fracture pinning, wound isolator for, July 498  
incidence, July 475  
laminar airflow in prevention of, effectiveness of, July 466-468  
Postural problems: after gastrostomy, Sept. 704  
Potter's syndrome: with pulmonary hypoplasia, Apr. 280  
Prematurity: gastrostomy in esophageal atresia in, Sept. 687  
Prenatal ultrasound: in congenital cystic adenomatoid malformation of lung, Apr. 295  
Presacral rectopexy (see Rectopexy, presacral)  
Pressure sore  
  ischial, myocutaneous flap closure of, May 369  
  reconstruction, flaps for, muscle and myocutaneous, May 367-369  
  results, May 382-383  
  use frequency, May 368  
Prostate: rhabdomyosarcoma, in children, Mar. 174-177  
Prostrectorectal fistula: omental transposition in, Nov. 841-842  
Prosthesis  
  Chopart amputation, Oct. 772 in place, Oct. 773  
  polypropylene, molded, lined with Pelite, Oct. 771  
Psychological problems: of gastrostomy, Sept. 704  
Pterygoid muscle: forces exerted on mandible by, Aug. 630  
Puborectal sling operation: in rectal prolapse, June 431-432  
Pulmonary  
  (See also Lung)  
  arteriovenous fistula, Apr. 299-301  
  artery agenesis, Apr. 303  
  dysplasia, pneumonectomy in, Apr. 251  
  hypoplasia  
    primary, Apr. 278-284  
    secondary, Apr. 279-284

secondary, conditions associated with, Apr. 279  
secondary, with Potter's syndrome, Apr. 280  
lymphangiectasia, Apr. 301-303  
primordium, Apr. 254  
vessel  
  anomalies, congenital, Apr. 298-303  
bed and bronchiectasis surgery, Feb. 137  
Pulse volume: recordings in diabetic foot, Oct. 739-740

## Q

Quality of life: after pelvic exenteration, Dec. 902

## R

Radiation  
  diagnostic (see Radiography)  
  induced brachial plexopathy, omental transposition in, Nov. 850-851  
injury, gastrointestinal, omental transposition in, Nov. 833  
osteonecrosis of clavicle, omental transposition in, Nov. 845  
therapeutic (see Radiotherapy)  
wound, ischemic, closed with myocutaneous flap, May 359  
Radiography  
  of empyema, Jan. 13  
  of lung abscess with dysphagia, Jan. 62-65  
  of pneumonia, suppurative, Jan. 45  
Radiotherapy  
  of breast cancer, recurrence after, Nov. 819  
  of neuroblastoma, total body, in children, Mar. 195-196  
  of oral cancer, complication rate, Aug. 598  
of rectum carcinoma, adjuvant, Dec. 918-921  
of tongue cancer  
  adjuvant, Aug. 618-623  
  anterior, recurrence and survival after, Aug. 606  
  failure, salvage attempt after, Aug. 594  
  recurrence rates after, Aug. 592-593  
  selection considerations, Aug. 590-591  
  small, thin, Aug. 597

**Radiotherapy (cont.)**  
 survival after, Aug. 592-593  
 of Wilms tumor, Mar. 203-204  
**Reconstruction**  
 abdominal wall (see *Abdomen, wall, reconstruction*)  
 arterial (see *Foot, diabetic, arterial reconstruction in*)  
 back (see *Back, reconstruction*)  
 breast (see *Breast, reconstruction*)  
 chest wall (see *Chest wall, reconstruction*)  
 genital, flap use frequency in, May 370  
 head (see *Head, reconstruction*)  
 knee (see *Knee, reconstruction*)  
 lip (see *Lip, reconstruction*)  
 lower extremity (see *Extremities, lower, reconstruction*)  
 mandible, flaps for, May 361  
 mediastinum, results with flaps, May 379-380  
 neck (see *Neck, reconstruction*)  
 oral, cervical and pectoral flaps for, Aug. 617  
 orofacial-mandibular, flaps for, May 361  
 pelvis, omental transposition in, Nov. 834, 835, 836  
 perineum (see *Perineum*)  
 pressure sore (see *Pressure sore, reconstruction*)  
 rectum, in pelvic cancer, Dec. 912-913  
 soft tissue, in tongue cancer, Aug. 616-618, 619  
 tibial vessel, in diabetic foot, Oct. 754-756  
 vagina (see *Vagina, reconstruction*)  
**Rectopexy**  
 Marlex mesh, June 420  
 perineal, June 439-440  
 presacral, June 418-423  
     with colonic plication, June 423  
     with sigmoid resection, June 418-423  
**Rectosigmoid:** redundant, in rectal prolapse, June 405  
**Rectosigmoidectomy:** perineal, in rectal prolapse, June 434-437  
**Rectovaginal septum:** Dec. 896  
**Rectum**  
 adenocarcinoma, Dec. 895  
 carcinoma  
     locally advanced, omental transposition in, Nov. 836-837  
     pelvic exenteration in (see *Pelvis exenteration, in rectum carcinoma*)  
 radiotherapy in, adjuvant, Dec. 918-921  
 intussusception of, June 406  
 plication, longitudinal, June 430  
 prolapse, June 402-451  
     abdominal procedures, June 414-432  
     anal orifice encirclement in, June 432-434  
     anal sphincters in, June 405  
     anatomical considerations, June 404-407  
     anatomical factors for, predisposing, June 405  
     author's experience, June 445-446  
     in children, June 413  
     clinical features, June 409-410  
     colopexy in, June 417-418  
     continence restoration after surgery of, June 443  
     cul-de-sac, abnormally deep, June 405  
     cul-de-sac, obliteration of, June 415  
     Devadhar operation in, June 430-431  
     diagnosis, differential, June 411-413  
     diagnostic characteristics, June 412  
     Dunphy operation in, June 416-417  
     etiology, June 403-409  
     graciloplasty in, June 438-439  
     Graham operation in, June 416-417  
     incidence, June 403  
     incontinence after surgery, problem of, June 442-445  
     investigation, June 410-411  
     Ivalon sponge repair of, June 427-429  
     levator ani in, June 405  
     levator ani plication in, June 416  
     Loygue procedure in, June 420  
     Moschowitz operation in, June 414-415  
     perineal procedures, June 432-439  
     perirectal injection of sclerosing agent, June 413  
     physiologic considerations in, June 407-409  
     puborectalis sling operation in, June 431-432

rectal attachments, loss of, June 405

rectopexy in, perineal, June 439

rectosigmoid, redundant, June 405

rectosigmoidectomy in, perineal, June 434-437

resection, low anterior, June 429-430

resection, mucosal sleeve, June 437-438

Ripstein operation (see Ripstein operation)

surgical procedures, June 414

surgical procedures, principles of, June 415

Teflon sling repair of, June 424

terminology, June 403

transsacral approaches, June 440-441

treatment, June 413-441

treatment, nonoperative, June 413-414

true, vs. mucosal prolapse, June 412

reconstruction in pelvic cancer, Dec. 912-913

surgery, omental transposition in, Nov. 834-836

wall plication with mucosal sleeve resection, June 437

Rectus

- abdominis myocutaneous flap, May 336
- femoris myocutaneous flap, May 338

Reflux: gastoesophageal, and gastrostomy, Sept. 687-688

Renal tumors: in children, Mar. 198-211

Respiratory tract, lower, embryology of, Apr. 252-256

- alveolar elements of, Apr. 252-255
- bronchial elements in, Apr. 252-255
- normal, Apr. 252-256
- vascular supply, Apr. 255-256

Rest pain in diabetic foot, Oct. 741-742

- criteria for, Oct. 741-742

Revascularization: in diabetic foot, Oct. 743-759

Rhabdomyosarcoma, in children, Mar. 170-184

- anomalies associated with, Mar. 171
- bladder, Mar. 174-177
- diagnosis, Mar. 172-173

extraorbital, Mar. 181-182

extremity, Mar. 177-180

familial features, Mar. 171

genitourinary tract, Mar. 174-177

head, Mar. 181-182

historical background, Mar. 170-171

management principles, Mar. 173-174

mortality, and influence of site, Mar. 176

neck, Mar. 181-182

orbital, Mar. 182

paratesticular primary sites, Mar. 180-181

pathology, Mar. 171-172

prostate, Mar. 174-177

staging, Mar. 172-173

- by clinical group, Mar. 173

tongue, Aug. 637-638

trunk, Mar. 177-180

uterus, Mar. 174-177

vagina, Mar. 174-177

Rhomboideus major muscle flap, May 342

Rib: in open drainage of empyema, Jan. 24

Ripstein operation in rectal prolapse, June 423-427

- complications, June 426
- recurrence rates after, June 424

Room isolator, July 507

## S

Sacral defects: obliteration of, Dec. 917-918

Salivary gland: tumors, minor, under tongue, Aug. 639

Sarcoma, in children

- Ewing's, extraosseous, Mar. 231
- leiomyosarcoma, Mar. 233
- liposarcoma, Mar. 233
- neurofibrosarcoma, Mar. 232-233
- soft tissue, small-cell, Mar. 232
- synovial, Mar. 231-232

Sartorius muscle flap, May 342

Schwannoma: tongue, Aug. 639

Sci-Med environmental system, July 515-517

Scimitar syndrome, Apr. 298-299, 300

Sclerosing agent: perirectal injection of, June 413

Sensory innervated flaps, May 354-355

Sequestration, Apr. 268-274

- anomaly, unusual, Apr. 271

Sequestration (cont.)  
 extralobar, Apr. 272  
 intralobar, Apr. 272-274

Serratus anterior muscle flap, May 342

Sex distribution: of malignant teratoma, in children, Mar. 218

Shriners Burn Institute, July 519-521

Sigmoid resection: with presacral rectopexy, June 418-423

Sinus: post-cystectomy, omental transposition in, Nov. 842

Skin  
 blood supply to, and flaps, May 330  
 graft, split thickness, of omentum, Nov. 827  
 irritation after gastrostomy, Sept. 694-695

Smoking: and oropharyngeal cancer, Aug. 569

Soft tissue  
 reconstruction in tongue cancer, Aug. 616-618, 619  
 sarcoma, small-cell, in children, Mar. 232

Soleus  
 muscle flap, May 343  
 for tibia, May 344  
 myocutaneous flap, May 340

Solid tumors, malignant, in children, Mar. 167-242  
 (See also Children, cancer)

Specialized protective environments: isolators, clinical experience with, July 521-541

Sphincter(s)  
 anal, in rectal prolapse, June 405  
 oral, muscle and myocutaneous flaps for, May 363

Sphincteroplasty: plication, June 444

Spine coverage: flaps for, muscle and myocutaneous, May 367

Sputum: expectorated, in lung abscess, Jan. 65

Stomach gastrostomy, Sept. 668-671 completed, Sept. 671

Staphylococcal pneumatocele, Jan. 54

*Staphylococcus aureus*: in lung abscess, Jan. 58

Stasis: gastric, after omental transposition, Nov. 855

Stenosis: iliac artery, angioplastation, in diabetic, Oct. 749

Sterilization: in empyema after lung resection, Jan. 35-36

Sternomastoid myocutaneous flap, May 334

Sternum: flap for, muscle and myocutaneous, May 365

Stoma (see Gastrostomy, stoma)

Stomach  
 (See also Gastrointestinal)  
 cancer, omentectomy in, Nov. 812  
 devascularization after omental transposition, Nov. 856  
 omentum detachment from, Nov. 814-815  
 perforation, omental transposition in, Nov. 830-831  
 separation from abdominal wall after gastrostomy, Sept. 689  
 stasis after omental transposition, Nov. 855  
 wall injury, posterior, and gastrostomy, Sept. 692

Stromal tumors: in children, Mar. 221-222

Stryker frames: for isolator, July 507

Subperiosteal hemorrhage: in neuroblastoma, in children, Mar. 187

Supraglottic lesion: neural pathways referring pain to ear, Aug. 577

Surgical intensive care units, July 541-544  
 -acquired infection, prevention of, July 541-542  
 BCNUs on, July 544  
 design of, architectural, July 542-543  
 isolators for, July 544  
 laminar airflow rooms, July 544  
 standard isolation techniques in, July 543-544

Surgical isolator (see Isolators, surgical)

Syme amputation, Oct. 772

Sympathectomy: in diabetic foot, Oct. 781-783

Synovial sarcoma: in children, Mar. 231-232

Synovioma: malignant, in children, Mar. 231-232

Systolic pressure  
 digital, Sept. 739  
 in tibial artery, posterior, measurement of, Oct. 737

## T

Teflon sling repair: of rectal prolapse, June 424

Temperature: and cross-contamination in wards, July 501

Temporal vessels: superficial, Nov. 847

Temporalis muscle  
flap, May 341  
forces exerted on mandible by, Aug. 630

Tendon  
flaps that carry, May 352  
patellar, defect reconstruction, flap for, May 371  
vascularized, compound  
myocutaneous flap carrying, May 353

Tensor fascia lata myocutaneous flap, May 337-338

Teratoma, malignant, in children, Mar. 216-220  
diagnosis, Mar. 217  
age at, Mar. 218  
pathology, Mar. 216-217  
sex distribution, Mar. 218-220  
site of origin, Mar. 218  
therapy, Mar. 217-220

Testes, tumors, in children, Mar. 223-226  
classification, Mar. 224  
diagnosis, Mar. 225  
incidence, Mar. 224  
therapy, Mar. 225-226

Thanatophoric dwarf, Apr. 281

Thiersch procedure, June 432  
Notaras variation of, June 434

Thigh  
flaps for, muscle and myocutaneous, May 370  
flaps from, myocutaneous, May 340

Thoracentesis, Jan. 79  
amebic empyema responding to, Jan. 75

Thoracic  
(*See also Chest*)  
dystrophy, asphyxiating, Apr. 282  
surgery, omental transposition in, Nov. 847-849

Thoracoacromial vessels, Aug. 619

Thoracoplasty: in bronchopleural fistula, Jan. 38

Thorax (*see Chest*)

Thrombosis: venous, after omental transposition, Nov. 854

Tibia  
in osteomyelitis, muscle flap closure, May 357  
soleus muscle flap for, May 344

Tibial  
artery, posterior, systolic pressure measurement in, Oct. 737

vessel reconstruction in diabetic foot, Oct. 754-756

Tobacco smoking: and oropharyngeal cancer, Aug. 569

Toe  
"blue toe syndrome," Oct. 751  
gangrenous, in diabetic, Oct. 779  
treatment, Oct. 768-769  
pressures in prediction of healing of amputations in diabetic, Oct. 762-763

Tomography, computed  
of breast cancer recurrence, Nov. 821  
in lung abscess, Jan. 64  
of lung cystic adenomatoid malformation, congenital, Apr. 297  
of lung herniation, Apr. 251  
in neuroblastoma, in children, Mar. 192  
of omentum in ovarian cancer, Nov. 811  
of Wilms tumor, bilateral, Mar. 200

Tongue  
base, anatomical relations of, Aug. 575  
cancer (*see below*)  
carcinoma, verrucous, Aug. 638-639  
examination, Aug. 573  
hemangioma, Aug. 639  
lesions  
neural pathways referring pain to ear, Aug. 577  
odd, Aug. 639  
myoblastoma, granular cell, Aug. 639  
resection (*see Tongue cancer, tongue resection in*)  
rhabdomyosarcoma, in children, 637-638  
salivary gland tumors under, minor, Aug. 639  
schwannoma, Aug. 639

Tongue cancer, Aug. 565-5653  
ablation of primary site with adequate margin, Aug. 610-623  
anterior  
pull-through operation for, Aug. 599, 600, 601, 602  
surgery, recurrence and survival after, Aug. 606

base  
mandible resection, Aug. 631  
pectoralis myocutaneous flap in, Aug. 632

Tongue cancer (cont.)  
 treatment, guidelines, Aug. 629  
 treatment, results, Aug. 624-626  
 treatment, techniques, Aug. 628-634  
 biopsy, Aug. 578-579  
 chemotherapy, Aug. 634-637  
 diagnosis, Aug. 570-578  
 etiology, Aug. 568-570  
 immunotherapy, Aug. 637  
 large, soft tissue reconstruction in, Aug. 616-618, 619  
 mandible resection in, Aug. 613-615  
 with tongue resection, Aug. 612-613  
 massive, treatment of contralateral lymph nodes for, Aug. 615-616  
 moderate-sized, more invasive, treatment options, Aug. 604-607  
 neck dissection for, Aug. 607-610  
 posterior third, Aug. 623-628  
 problem of, Aug. 567-578  
 pull-through procedure, Aug. 611-612  
 radiotherapy (see Radiotherapy, of tongue cancer)  
 salvage attempt after irradiation therapy failure, Aug. 594  
 self-inflicted, Aug. 570  
 small, thin  
 excision margins, adequate, Aug. 596  
 excision margins, inadequate, Aug. 595  
 treatment, Aug. 589-604  
 staging, Aug. 579-583  
 surgery, selection considerations, Aug. 590-591  
 tongue resection in  
 nonstandard, Aug. 613, 614  
 with resection of margin of mandible, Aug. 612-613  
 treatment  
 historic background, Aug. 583-588  
 options, selection of, Aug. 588-589  
 planning, Aug. 583-588  
 Toxicity: and lung abscess, Jan. 63  
 Trachea  
 agenesis, Apr. 256-257  
 atresia, Apr. 256-257  
 diverticulum, Apr. 258-259  
 Tracheal bronchus, Apr. 258-259

Transmetatarsal  
 amputation (see Amputation in diabetic, transmetatarsal)  
 pulse volume recordings, Oct. 740

Transplantation (see Marrow, transplantation)

Trapezius myocutaneous flap, May 334

Trexler Isolator, July 502-506  
 diagram of, July 506

Trexler-Vickers Isolator, July 494, 496-499, 506  
 bed, July 510, 511

Trunk: rhabdomyosarcoma, in children, Mar. 177-180

Tube  
 gastrostomy (see Gastrostomy, tube)  
 nasogastric, vs. gastrostomy, Sept. 683-685

Tumors  
 germ cell, in children, Mar. 220-221  
 extragonadal, Mar. 233  
 kidney, in children, Mar. 198-211  
 lung, Apr. 297-298  
 lung cysts and, in children, Apr. 286  
 malignant (see Cancer)  
 mediastinal, in neuroblastoma, in children, Mar. 187  
 recurrence after omental transposition, Nov. 856  
 salivary gland, minor, under tongue, Aug. 639  
 solid, malignant, in children, Mar. 167-242  
 (See also Children, cancer)  
 stromal, in children, Mar. 221-222  
 testes (see Testes, tumors, in children)  
 Wilms (see Wilms tumor)

U

Ulcer  
 decubitus, May 367-369  
 heel, in diabetic, Oct. 773-776  
 neuropathic, of foot, Oct. 731-732  
 treatment, Oct. 767-768  
 pressure (see Pressure sore)

Ulm flexible film plastic isolator, July 503

Ultraclean air, July 462-473  
 in heart surgery, July 473  
 laminar airflow, July 463-466  
 study of, major multicenter, July 469-473

Ultrasound  
prenatal, in congenital cystic adenomatoid malformation of lung, Apr. 295  
of Wilms tumor, Mar. 202-203

Ultraviolet light: in nosocomial infection prevention, July 474-479

Ureteroileal open anastomosis: illustration, Dec. 911

Ureterolysis: omental transposition in, Nov. 842

Urinary diversion: in pelvic cancer, Dec. 908-912

Urology: omental transposition in, Nov. 839-843

Uterus: rhabdomyosarcoma, in children, Mar. 174-177

## V

Vagina  
adenocarcinoma, clear cell, in children, Mar. 234  
reconstruction  
in cancer, Dec. 914-915  
with gracilis myocutaneous flap, May 339  
rhabdomyosarcoma, in children, Mar. 174-177

Valve cutter: Leather's intraluminal, Oct. 755

Valvulotome: Mill's, Oct. 755

van der Waaij: bed isolator design by, July 518

Vanillylmandelic acid: in neuroblastoma, in children, Mar. 197

Vastus  
lateralis muscle flap, May 342  
medialis myocutaneous flap, May 338-339

Vein  
bypass, *in situ*, in diabetic foot, Oct. 753-754  
new horizons, Oct. 754  
grafts, reversed, in diabetic foot, Oct. 756-759  
portal, system, Nov. 799  
thrombosis after omental transposition, Nov. 854

Ventilated suits: whole body exhaust, major multicenter study of, July 469-473

Ventral hernia: after gastrostomy, Sept. 689-691

Vesicovaginal fistula (*see* Omentum, greater, transposition, in vesicovaginal fistula)

Vesicovaginorectal fistula: omental transposition in, Nov. 840-841

Vessels  
in leg, lower third, distal anastomoses to, in diabetic foot, Oct. 758

pulmonary (*see* Pulmonary, vessel supply  
for muscle flap, May 324-325, 326  
of respiratory tract, lower, Apr. 255-256

temporal, superficial, Nov. 847

thoracacromial, Aug. 619

tibial, reconstruction in diabetic foot, Oct. 754-756

Vomiting: and gastrostomy, Sept. 703

## W

Wards: control of microbial cross-contamination on, July 500-544

Wells procedure, June 427

Wilms tumor, in children, Mar. 198-211  
anomalies and, congenital, Mar. 198-199  
bilateral, Mar. 209-210  
CT of, Mar. 200  
chemotherapy, Mar. 203-204  
classification, new histologic, from NWTS 2, Mar. 205-206  
diagnosis, Mar. 199-200  
genetic factors in, Mar. 198-199  
histology in prognosis, significance of, Mar. 207  
incidence, Mar. 198-199  
metastases at diagnosis, Mar. 208  
National Wilms Tumor Studies  
1, Mar. 204-205  
2, Mar. 205  
3, Mar. 206-208  
results, Mar. 204-208  
outcome, factors influencing, Mar. 206  
radiotherapy of, Mar. 203-204  
recurrent, Mar. 208-209  
stage IV, Mar. 208  
staging, Mar. 200-201  
surgery, initial, Mar. 201-203  
ultrasound of, Mar. 202-203

Witzel gastrostomy, Sept. 671
